## **ONYX Hub software brings business intelligence to wide format**

*Provides smart data to make better business decisions*

SALT LAKE CITY, Jul. 11, 2017 – Onyx Graphics, Inc., today announced the immediate release of ONYX Hub software, the latest product in the ONYX SiteSolutions family. ONYX Hub software is designed to bring real-time, historic and trend data to business owners and production managers, enabling them to make better business decisions. Licensed through any ONYX Thrive workflow software key, customers can use the browser-based dashboard and reporting features to gain visibility into their entire production environment.

### **About ONYX Hub software**

ONYX Hub software is a business intelligence tool with a browser-based dashboard that provides easy-to-understand data across a print service provider's entire site, enabling better business decisions. It collects data by job, station and printer, presented in real-time, for immediate visibility into the shop's production environment. With up-to-the-minute and historic ink usage and media waste reporting, users can better understand their costs, improve profitability and diagnose areas to increase efficiency. With ONYX Hub software, users gain insight using trend reporting to optimize workflow and better manage their business.

### **ONYX SiteSolutions**

Onyx Graphics recognizes that modern print shops need solutions that will increase their production and revenue, lower their costs, and increase shop efficiency in order to compete. ONYX SiteSolutions is a portfolio of products that take a unique approach to giving business owners information about their print jobs, costs and productivity across their entire site. ONYX SiteSolutions address the areas of print production, connected workflows, and leveraging data to make better business decisions.

### **Availability**

Customers can obtain more information on how to get started with ONYX Hub software through their authorized reseller or by visiting [onyxgfx.com/onyxhub](http://onyxgfx.com/onyxhub).

### **About Onyx Graphics, Inc.**

Leading the industry since 1989, Onyx Graphics is dedicated to helping customers increase productivity, reduce costs, and gain a competitive edge with superior print and color quality. Its passion for delivering superb color led to the development of ONYX Color, Onyx Graphics' own color engine optimized specifically for large format inkjet printing. Innovative, productive, and satisfied customers around the globe help motivate the company to continually develop and enhance its leading-edge technologies. Global channel partnerships and longstanding relationships with printer manufacturers position Onyx Graphics as a market leader in powerful, reliable, large format printing workflow software.
